## OVERVIEW

### Purpose

This document is to be used as a companion document to the Health Insurance Portability and Accountability Act (HIPAA) Implementation Guides. It is designed for implementation of the HIPAA Transaction for Institutional and Professional Claims/Encounters: Health Care Claims: 837 ASC X12N 837 v5010A1

### Implementation Guides

The HIPAA Implementation Guides are maintained by Washington Publishing Company and can be downloaded from their web site: <http://www.wpc-edi.com/>, the original documents are available as a PDF. This document is the transactional layout for the X12 Transactions as a continuous stream of data using delimiters to denote the end of the data. The Infinedi Claims Processing System standard is to receive and send data in the HIPAA ASC X12 837. Trading Partners who wish to transmit claim files under this format must test individual system files prior to production claim streams with Infinedi Claims Processing System.

### Basic Character Set

Infinedi Claims Processing System will support the Basic Character Set as defined by the American National Standards Institute (ANSI) with the following exceptions: The '#' and '@' are allowed and the ':' and '\*' are not allowed. (The colon and asterisk are used as sub-element delimiters in the claim translations. The '#' is used in some addresses and the '@' is needed for email address.) All other characters will be removed from the content prior to transmitting to the receiver of the claim transaction.

A..Z	0..9	!	"	&	'	(	)	+	-	,	.	/	;	?	=	"	(Space)	#	@
------	------	---	---	---	---	---	---	---	---	---	---	---	---	---	---	---	---------	---	---

### Extended Character Set

a..z	%	~	[	]	_	{	}			<	>	\$
------	---	---	---	---	---	---	---	--	--	---	---	----

### Data Content

Background Payers who are operating under contingency plans under the Centers for Medicare and Medicaid Services (CMS) enforcement guidelines for HIPAA present special issues. Such payers may accept claims transactions in a HIPAA format, but may not be prepared to accept or use all of the data content. Infinedi, LLC continues to work with both submitters and receivers of claim transactions to ensure that the EDI transactions continue to flow. Providers should begin to submit data content using the rules in the HIPAA Implementation Guides.

Infinedi, LLC will enforce X12 syntax rules for all claims going to receivers of the 837 Transaction. Claims that fail to meet the syntax requirements will be rejected and must be corrected and resubmitted by the submitter.
